LANGUAGES

SPANISH: NATIVE

ENGLISH: INTERMEDIATE (B1)

FRENCH: BASIC (A1)

EDUCATION

Multimedia Engineering
Universidad Autónoma de Occidente
Cali, Colombia | 2015–2024

Thesis: Unity-based promotional video game developed for the Faculty of Engineering.

Multimedia Design
Academia de Dibujo Profesional
Cali, Colombia | 2013–2015

Focus: Multimedia design and interactive digital experiences.

PROFESSIONAL EXPERIENCE

Frontend / Full-Stack Web Developer
Clínica Colombia ES — Cali, Colombia
Jul 2025 – Present

Responsible for the development, maintenance, troubleshooting, and continuous improvement of multiple web applications across the organization's digital ecosystem, working with React.js, TypeScript, JavaScript, Node.js, REST APIs, Supabase, Azure, and WordPress.

Key responsibilities & achievements:

- Develop and maintain full-stack web applications with React.js, TypeScript and Node.js, delivering new features end to end.
- Build and consume REST APIs with Node.js, connecting applications to Supabase (PostgreSQL) and third-party services.
- Participate in the implementation, maintenance, troubleshooting, and continuous improvement of existing applications.
- Diagnose and resolve application issues, ensuring stability, performance, and cross-device compatibility.
- Maintain and enhance existing WordPress applications using PHP, JavaScript, HTML5, and CSS3.
- Apply responsive design, accessibility, performance, and software quality best practices.
- Collaborate on the modernization of existing platforms toward modern React-based architectures.
- Use Git/GitHub-based workflows for source control and application maintenance.

Technologies:
Node.js · TypeScript · React.js · Supabase (PostgreSQL) · Azure REST APIs · WordPress · PHP · Git/GitHub

PROFESSIONAL PROFILE

Full Stack Developer with 3+ years of experience building web applications with Node.js, TypeScript, JavaScript and React. Experienced designing and integrating REST APIs, webhooks and third-party SDKs, and working with PostgreSQL on Supabase (raw SQL, schema migrations, Row-Level Security). Hands-on with AWS (EC2, S3), Docker and Vercel deployments. Background in fintech (digital wallet with transactional and OTP flows) and e-commerce. Uses AI coding assistants (Codex, Claude) daily and builds AI agent integrations. Quality-oriented, analytical and accountable for deliverables.

TECHNICAL SKILLS

FRONTEND
React.js · Next.js · React Native · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Tailwind CSS · Bootstrap

BACKEND & INTEGRATION
Node.js · TypeScript · REST APIs · Webhooks · SDK Integrations · Supabase Edge Functions · n8n · PHP

DATABASES
PostgreSQL (raw SQL, migrations, RLS) · Supabase · MySQL · Oracle · Firebase

TOOLS
Git · GitHub · npm · AI coding assistants (Codex, Claude)

CLOUD
AWS (EC2, S3) · Docker · Azure · Vercel

PRACTICES
API Design · Third-party Integrations · AI Agents · Troubleshooting

Frontend / Full-Stack Web Developer — Freelance

GP3Digital — Cali, Colombia | Project-Based

Apr 2025 – Present

Deliver web solutions for clients in healthcare, commerce and agency environments. Key project: THE LOKI STORE (thelokistore.com), a custom e-commerce platform built with React, TypeScript, Supabase (PostgreSQL) and AWS.

Key Responsibilities & Achievements:

- Built and maintain a custom e-commerce platform (React, TypeScript) with orders, inventory and payments.
- Designed PostgreSQL schemas on Supabase with raw SQL views, migrations and Row-Level Security.
- Deployed services on AWS EC2 (Docker, HTTPS reverse proxy) and served product assets from Amazon S3.
- Integrated the Meta WhatsApp Cloud API through webhooks and Supabase Edge Functions (TypeScript).
- Built AI agent workflows (n8n + Claude/Gemini APIs) with tools to query live stock, orders and payment links.
- Deliver web solutions for other clients with React, Next.js, REST APIs, CMS platforms and Firebase.
- Use AI coding assistants (Codex, Claude) daily alongside Git/GitHub workflows.

Technologies:
Node.js · TypeScript · React.js · Next.js · PostgreSQL · Supabase · AWS (EC2, S3) · Docker · REST APIs · Webhooks · n8n · Claude · Codex · Git

Frontend Developer — React Native

Preztel SAS — Cali, Colombia

Feb 2025 – Jul 2025
Fintech Wallet Application

Contributed to the development of a fintech digital wallet application for managing users, accounts, balances, currencies, and financial transactions, with a strong focus on security, performance, usability, and scalable frontend architecture.

Developed and maintained a fintech mobile application using React Native, TypeScript, JavaScript, REST APIs, React Query, React Hook Form, and Git-based workflows.

Key Responsibilities & Achievements:

- Developed and maintained mobile application features using React Native, TypeScript, and JavaScript, following reusable and modular component architecture.
- Built and integrated transactional flows for digital wallet operations, including balance management, transfers, account management, and transaction-related functionality.
- Integrated the mobile application with REST APIs, handling asynchronous data flows, validation, error states, and communication with backend services.
- Implemented OTP-based verification flows for security-sensitive user operations and profile updates.

LinkedIn:
https://co.linkedin.com/juanjoseborrero

Github:
https://github.com/juanjosbg

Portfolio: profile-juanjose.vercel.app

- Developed and maintained CRUD functionality for user financial accounts, including account information, banking data, document information, and related validations.
- Built transaction interfaces with balance validation, minimum transfer rules, currency-related data, and user feedback states.
- Worked with React Query for server-state management, API synchronization, caching, and data fetching.
- Implemented complex forms and validation using React Hook Form and Yup, improving consistency across transactional and account-management flows.
- Collaborated with backend and product teams to integrate new endpoints, troubleshoot application issues, and deliver new functionality.
- Contributed to application maintainability through reusable components, Git-based workflows, code quality practices, and structured frontend development.

Front-End / Software Developer

Mágica Escultura — Cali, Colombia
Aug 2024 – Feb 2025

Responsible for the modernization, development, and optimization of an e-commerce platform for an aesthetic clinic, focusing on user experience, website performance, online sales, payment processing, data management, analytics, and lead-generation workflows.

Key Responsibilities & Achievements:

- Developed and maintained web functionality using PHP, JavaScript, HTML5, and CSS3.
- Developed responsive interfaces and customized application functionality based on business requirements.
- Integrated REST APIs, payment gateways, Supabase (PostgreSQL) and Oracle Database.
- Implemented and maintained e-commerce functionality, including checkout and transactional workflows.
- Troubleshot application issues and implemented continuous usability and performance improvements.

Technologies:
WordPress · PHP · JavaScript · HTML5 · CSS3 · Supabase · Oracle Database · REST/API Integrations · Payment Gateway Integration · n8n · GA4 · GTM · Google Search Console · Technical SEO

Front-End / Software Developer

Prensa y Entretenimiento Agencia Creativa — Cali, Colombia

May 2023 – Oct 2023

Contributed to the development of scalable web applications and digital platforms, working across frontend development, backend services, API integrations, data management, and application deployment.

Key Responsibilities & Achievements:

- Developed dynamic and scalable web applications using React.js, TypeScript, and JavaScript.
- Built reusable component-based architectures following modern frontend development practices.
- Integrated frontend applications with Node.js services and REST APIs.
- Built responsive interfaces using HTML5, CSS3, Tailwind CSS, and Bootstrap.
- Managed development workflows using Git and GitHub.
- Collaborated on troubleshooting, feature implementation, API integration, and continuous improvement.

Technologies:

React.js · TypeScript · JavaScript · Node.js · REST APIs · Firebase · Strapi · HTML5 · CSS3 · Tailwind CSS · Bootstrap · WordPress · Git · GitHub · npm · Yarn
